

Data Protection Services (DPS)

- Complete server volume image
- Disk to disk block level backups
- On-site and off-site solution
- Virtualization of failed server
- Bare metal restores to dissimilar hardware
- 24X7 monitoring and management
- Exchange mailbox/message recovery
- SQL server database/table recovery
- Backups as frequent as every 15 minutes
- Up to 2:1 compression of all stored data
- 256-bit secure storage and off-site transfer
- Fast and efficient recovery of data

Eliminate these worries:

- Down time from failed servers
- Costly and unreliable tape backups
- Expensive offsite storage facilities
- Purchase of backup and recovery software
- Cost and time to maintain hardware/software
- Management of backup solutions
- Whether your data is safe
- Natural or man-made disasters
